B.S. in Software Engineering

COMSATS Unversity   📅 02/2023 - 01/2027   📍 Lahore, Pk | CGPA **3.33** / 4.0

EXPERIENCE

Software Developer | Freelance & Academic Projects

2023 - Present

- Developed cross-platform applications
- Built responsive UIs and integrated APIs
- Managed databases and optimized performance

Projects

SanaClothing Website **(E-commerce Platform)**

It's a comprehensive e-commerce website for a Pakistani clothing brand created with React, Node.js, and Express. Bootstrap was used for responsive design, EJS for templating, and modern HTML/CSS for styling to deliver an engaging shopping experience and also Admin Panel for Controlling.

Dynamic Weather App:

Presenting a Dynamic Weather App crafted with VanillaJS, seamlessly integrated with the OpenWeather API.

SpeakEasy Flutter App:

SpeakEasy is a Flutter-based language translation app designed for real-time voice and text communication across multiple languages. It uses voice recognition, translation APIs, and text-to-speech to assist users in breaking language barriers. The app offers a simple UI, dark mode, and translation history for a smooth user experience.

SKILLS

Client-Side

HTML   CSS   TailwindCSS   React

Next   Flutter   Java Script

RESTful API   React Native

Server-side

NodeJS   Express.js   MongoDB

MySQL   Firebase

Development & Operations

Jest   GIT   AWS S3   Agile Methodology
